

2024 Q4

QUARTERLY UPDATE

ASX.CD2

ASX RELEASE DATE: 11 FEBRUARY 2025

In 2024, U.S. private equity (PE) saw a strong rebound in activity which was a welcome change from the prior 12-month period. Deal count and deal value both saw significant year-over-year increases, driven by lower interest rates which help in aligning buyer and seller valuation expectations as well as allowing deals to proceed with confidence. Exit activity was also helped along by secondary buyouts, with PE firms acquiring 79 companies from other PE firms, with an aggregate value of US\$167b, which was up by over 100% from the year prior.

Despite a modest slowdown in Q4 2024 due to the U.S. Presidential Election, momentum was also fuelled by increasing pressure for capital returns from limited partners (LPs). EY surveyed US General Partners (GPs), with 57% expecting exits to increase over the next six months and for many, their exit readiness activities – inclusive of presale diligence, engaging bankers to help manage the sale, and preparing management teams for the process – has already begun in earnest. We are noticing this amongst the Fund Series – particularly CD1 and CD2 – and are hopeful for a fruitful 2025 for these portfolios.

Overall, the macroeconomic backdrop does remain mixed, despite a largely pro-business Government, risks such as tariffs, persistent high interest rates, budget cuts, and inflationary pressures from supply chain disruptions and consumer defaults all pose different pressures on the portfolio companies. While caution may persist, we are hopeful that our GPs can position themselves to benefit from an improving business climate in 2025 and capitalise on the increased market activity for their LPs.

As at 31 December 2024, the Fund had 38 portfolio companies, with six (6) of those deemed inactive and unlikely to have significant value extracted.

Of the remaining 32 portfolio companies, it is considered that 28 of these are active earners, and five (5) have been impaired from their cost base in prior periods. Though these 5 have been impaired, they do still continue to hold value and a number have already returned capital during the hold period. This is consistent with prior quarterly reports regarding the representative value of the top ten portfolio companies within the Fund.

CASH FLOW MANAGEMENT (FUND 2 & LP2)

In light of the recent distributions announced in January 2025 (CD2 announcement of \$0.09 per Unit [here](#)), as well as the notable increase in underlying portfolio activity, we've received queries from Investors regarding the underlying cash flow management policies of the Fund, which we are pleased to share more detail on. The below is a snapshot of the Fund and LP cash following the distribution announced to Unitholders, which was partially funded by a distribution from the LP to the Fund.

Similar principles to what K2 shared in the October 2023 presentation apply (presentation [here](#)), with distributions being determined based on available and projected cash flows at both the Fund level (managed by K2 as the RE) and at the LP level (managed by the General Partner (GP)). The RE does not have discretion over the cash management of the LP.

Fund's non-controlling interest in LP2 Cash	US\$2.6m

The LP's remaining capital commitments are subject to change as allowed under the individual Limited Partnership Agreement (LPA). Though the remaining commitment will change with each capital call or distribution, it is the Manager's expectation that the underlying Funds will not call this full amount, and that any capital calls should be funded by distributions in the future.

*Working capital includes a projected 2.5 year period of management & administration fees, professional fees, ASX fees (where applicable), registry fees, accounting, audit & compliance, as well as an allowance for any expected Fund-level taxes.

[^]While we work to keep this cash buffer as modest as possible, conservatively we wish to be able to account for any unforeseen Fund level expenses or unfavourable FX movements.

Staple Street Capital

Eastern Dental, a leading dental services organisation, is a long-standing and established leader in the state. Since its inception in 1978, the Company has developed a strong brand reputation with customers and numerous payors.

Staple Street first acquired the company in 2020 and during the successful hold period, they were able to implement a strong leadership team for the business, improve business processes, divest non-core assets and ensure that the company was focussing on the core operations. The business was acquired by Branford Castle Partners, a middle-market private equity firm.

LP2 REALISATION PIPELINE¹

As guided in Q2 2024, we expect that the sales pipeline will continue to evolve during 2025, particularly as market conditions have continued to improve. The LP2 realisation pipeline indicates that 74% of the current LP value was expected to be in a sale process in 2025 and 2026. This may involve having a signed Letter of Intent or appointing an advisor to begin marketing the asset for sale. We await the receipt of the December quarter reports from the underlying managers for any update on these targets (expected in April 2025).
